MONGOOSE

DUMP BODY ADVANTAGE

MANUFACTURED BY:

INDUSTRY-LEADING DESIGN

Decades of proven engineering, premium materials, and reinforced components create a body built for the toughest applications.

THE ORIGINAL ELLIPTICAL BODY

Built on decades of manufacturing experience, the Mongoose elliptical design continues to deliver proven performance in the field.

AR-450 BODY PERFORMANCE

Built from AR-450 steel, the Mongoose is built to withstand extreme wear, heavy impact, and highly abrasive materials.

PROTECTED HIGH-LIFT SYSTEM

Protected cylinder placement and AR plate lift components help reduce wear and damage.

ENGINEERED STRENGTH

The reinforced center weld, optimized floor structure, and available crossmember reinforcement provide superior strength while maximizing payload capacity.

AR-450 REAR HINGES

AR-450 steel rear hinges provide exceptional wear resistance, increased durability, and reliable performance in the toughest applications.

SIDE TOP RAIL

A 6" x 4" rectangular tube top rail provides 38% greater strength and rigidity than traditional formed top rails.

SIDE-MOUNTED HIGH LIFT TAILGATE

Designed for easier maintenance, improved accessibility, and dependable tailgate operation.

CAB PROTECTOR

Features angle bracing for maximum strength. Options include 1/4, 1/2, 3/4 & Full.

GROUND-LEVEL GREASE ACCESS

Ground-level access to the top cylinder grease fitting makes maintenance easier, promotes proper lubrication, and eliminates dangerous shortcuts.
